

- Based on experiences acquired since 1991 and on a first company founded in 1994, Infomed was finally established in Geneva, Switzerland in 1997.
- Designs, produces and distribute blood purification devices.
- Products applicable in nephrology, intensive care, haematology and cardiology.
- On the European market, one device is installed per 100000 inhabitant. With almost 1000 machines and 20 years of experience around the world, Infomed has comforted its leadership as a provider of blood purification devices.

History

- 1997 : Foundation
- 1999 : Infomed placed the HF400 on the European market: At this time, it was the first hemofiltration machine for high flows and with combined pre-post dilution.
- From 2000 to 2003 : Infomed expanded its markets in Europe, Middle East and Asia for both plasma therapies and CRRT.
- 2003 : Infomed introduced the CF100, a cascade filter monitor to be connected to centrifuges
- 2004 : Infomed introduced the HF440 to better fit the needs for intensive care and included the CPFA treatment.
- 2005 : Infomed provides the complete range of products including filters, pre-assembled tubing sets.
- 2007 : Infomed developed a new version of CF100 as well as the CF200, the most effective machine for CRRT and TPE.
- 2008 : the DIMI system is designed for homecare peritoneal dialysis and hemofiltration.
- 2003 : The CF300, a new monitor for adsorption columns regenerated on-line have been created
